I'm Sambhav Jain, a frontend web developer passionate about crafting intuitive and impactful digital experiences. My journey began with a Bachelor's in Science. Over the past year, I've immersed myself in frontend technologies—HTML, CSS, Tailwind Css, JavaScript, and React. Through numerous projects

### Projects

#### ● Youtube video platform

Developed a React-powered YouTube video clone, utilizing useState and useEffect hooks for API integration. Implemented useContext with a custom context API for global state management, allowing a toggle sidebar and incorporating optional chaining for graceful handling of undefined and null values. Integrated React Router for seamless navigation, added search suggestions with debouncing for optimal API performance

#### ● Ricky And Morty - “Rick and Morty” is an American adult animated science fiction sitcom

Created a project showcasing Ricky and Morty characters using React, featuring effective state management with useState and useEffect hooks for seamless API integration. Implemented external libraries for pagination and search functionality to enhance user experience. The project emphasizes modern React practices, ensuring a responsive and engaging display of characters from the Ricky and Morty universe.

#### ● E-commers Shopping Cart

created a shopping cart functionality using JavaScript that allows users to seamlessly add products, adjust quantities in real-time, and remove specific items as needed. The cool part is that all the value calculations are displayed on the screen, ensuring a smooth and transparent shopping experience.
